

## **AI-supported warewashing technology from HOBART**

**HOBART is launching an unparalleled new product for the warewashing sector. With its intelligent functions, it is setting new standards.**

Offenburg, 26 February 2025 – **“Our passion. Your flow.” This is the slogan that accompanies warewashing expert HOBART’s latest technological innovation: the first flight-type dishwasher that uses artificial intelligence to ensure the lowest possible water consumption and seamless workflows – resulting in the ideal flow for your warewashing process. The new generation of flight-type dishwashers is equipped with a number of other innovative features. It will be showcased for the first time at the INTERNORGA trade show and will be available from May onwards.**

### **Automation via AI: for the perfect warewashing flow**

In recent years, artificial intelligence has made enormous progress and has become indispensable in many areas. AI also affects and changes warewashing in the commercial kitchen – automating processes, saving resources or reducing manpower: AI makes it possible.

“HOBART has developed a new flight-type dishwasher that uses AI-supported technology to achieve smooth, automated warewashing processes while significantly reducing operating costs,” says Managing Director Manfred Kohler. “This revolutionary innovation ensures the perfect flow for warewashing processes.” At the booth, trade show visitors can see the technology for themselves.

Between 14 and 18 March, the world market leader for warewashing technology will be showcasing further examples of efficient warewashing and cooking equipment at its booth at INTERNORGA in Hamburg, located in hall B7, booth 208.
